▶ Features and Benefits

Polycom® QDX 6000™

Audio	Benefits
Polycom 22 kHz StereoSurround™ with 2 channels of 22 kHz crystal-clear audio	• Hear everyone clearly and naturally • Superb clarity to hear the subtleties of every word, conversation and speakers • Hear all participants, even when multiple people are talking
Audio Error Concealment • Eliminates audio drop-outs on noisy networks	• Smooth and consistent verbal communications free from interruptions • Automatic correction of audio quality whenever needed
Multiple Audio Inputs for aux audio or DVD	• Allows far end to hear audio from PC or other multimedia device
Multiple Microphone Support	• High quality audio experience in medium to large rooms • Stereo support

Video	Benefits
High Resolution Video at lower bandwidths • DVD quality video (256 Kbps – 4 Mbps)	• Natural motion and superb video at any data rate
Polycom EagleEye™ QDX Camera • 1/3 2 MP CMOS Imager • 72 deg FOV at min zoom • 12x Optical Zoom • 16:9, 480p video • Sharp, quick focus	• Wide screen captures full room for maximum participation • Natural interaction between all meeting participants • Sharp, quick focus enables a highly productive meeting and eliminates technology issues
Lost Packet Recovery (LPR)	• Smooth uninterrupted video conferences, even on congested networks • Faster and more productive meetings • Seamless and automatic activation without IT intervention
Dual Monitor Emulation • View near and far video windows at the same time in native aspect ratio	• High quality communications for near end and far end participants • Optimal use of display investments
Dual Monitor Support	• Dual monitor effectiveness with the cost savings of a single monitor • Enriched meeting quality and knowledge sharing • Easily see people and their content

POLYCOM®

Content Sharing

Content Sharing	Benefits
Standards based H.239 ensures fully interoperability • People+Content IP allows users to share data through network without a direct connection to QDX 6000.	• Improved meeting quality with simultaneous speaker and content views • Uninterrupted conferences with intuitive on-touch content sharing
Adjustable Bandwidth for Content • System will automatically adjust bandwidth allocation when sharing content based upon content being shown	• Sustained meeting quality across a wide range of content during a video call • Users have best overall experience with no intervention

User Interface	Benefits
Logo Customization	• Organization can customize logos throughout; both on-screen and web-based interfaces
Message Overlay (closed caption type functionality)	• Multiple methods of sending messages to local and far end video gives users ability to send closed caption or other important messages during video call

Interoperability	Benefits
Standards-based	• Solid, reliable platform • Qualified by independent test labs • Interoperates with other standards-based systems in the industry • Easy to install even in a multi-vendor environment
